

*In the Manche, new landscapes are offered to you every 6 hours!*

With airs of small Ireland in the north of the department and the Wonder which radiates on the world in the south;  
the Manche has not finished surprising you!

Here, we change point of view every 6 hours, according to the tides and we discover unique atmospheres,  
breathtaking seaside landscapes, nature in its raw and wild state...

From Mont Saint-Michel, to the Gatteville lighthouse, via the Chausey archipelago and the landing beaches, many splendid landscapes await you in all weathers!  
Indeed, in the Manche, we enjoy the fresh air of nature, we live the present moment and we compose with the natural elements.
