Number of grants obtained as principal investigator: 28 (mostly from International Agency for Research on Cancer -IARC- Lyon, France; Italian Ministry of Health, Ricerca Finalizzata; Italian Ministry of Health, EUROMED Program; Italian Association for Cancer Research; Italian League Against Cancer)

**Present grant as Principal Investigator: AIRC (Italian Association for Cancer Research): “Cancer after solid organ transplant: evaluation of risk and biomarkers for occurrence and clinical course”.**

The investigation has three general aims: 1) to assess the spectrum of cancers that are diagnosed in excess in persons immunosuppressed after organ transplantation, and to identify risk factor for cancer occurrence; 2) to investigate the role of viral biomarkers on tumorigenesis; and 3) to investigate changes in the immune response that may represent specific biomarkers to identify high-risk patients.

***Main fields of activity:***

- Statistical and epidemiological support to clinical research;
- Statistical and epidemiological mentoring for young clinical scientists;
- Lecturer on statistical and epidemiological methods;
- Principal investigator of case-control studies on various risk factors for chronic diseases, mostly cancer and life styles;
- Principal investigator of studies on the the role of viral infectios on cancer occurrence: 1) Cohort and case-control studies on the association between viral infections and cancer; 2) Focus on population groups with acquired immune suppression (i.e., HIV-infected people and recipients of organ transplants);
- Management and direction of the Friuli Venezia Giulia population-based cancer registry;
- Principal investigator of descriptive studies focused on the epidemiology of cancer;
- Co-principal investigator of studies on cancer occurrence in the elderly;
- Scientific Director of the population-based cancer registry of the Friuli Venezia Giulia region, northeastern Italy.
